

Subtract Simple Proper Fractions with Unlike Denominators

$$1. \frac{16}{19} - \frac{1}{6} =$$

$$7. \frac{10}{16} - \frac{1}{4} =$$

$$2. \frac{16}{35} - \frac{2}{4} =$$

$$8. \frac{3}{4} - \frac{8}{16} =$$

$$3. \frac{5}{7} - \frac{11}{13} =$$

$$9. \frac{2}{3} - \frac{11}{18} =$$

$$4. \frac{5}{7} - \frac{21}{25} =$$

$$10. \frac{19}{20} - \frac{11}{54} =$$

$$5. \frac{5}{9} - \frac{11}{33} =$$

$$11. \frac{4}{7} - \frac{10}{28} =$$

$$6. \frac{6}{10} - \frac{1}{18} =$$

$$12. \frac{50}{80} - \frac{2}{6} =$$

$$1. \frac{1}{12} - \frac{5}{6} =$$

$$2. \frac{4}{6} - \frac{31}{8} =$$

$$3. \frac{15}{17} - \frac{2}{6} =$$

$$4. \frac{2}{3} - \frac{3}{31} =$$

$$5. \frac{7}{21} - \frac{1}{32} =$$

$$6. \frac{16}{40} - \frac{1}{46} =$$

$$7. \frac{4}{18} - \frac{3}{4} =$$

$$8. \frac{9}{10} - \frac{1}{13} =$$

$$9. \frac{10}{21} - \frac{1}{13} =$$

$$10. \frac{3}{17} - \frac{1}{15} =$$

$$11. \frac{7}{19} - \frac{2}{13} =$$

$$12. \frac{1}{22} - \frac{1}{26} =$$

$$1. \frac{3}{16} - \frac{5}{6} =$$

$$7. \frac{10}{15} - \frac{11}{8} =$$

$$2. \frac{7}{9} - \frac{2}{3} =$$

$$8. \frac{4}{12} - \frac{1}{24} =$$

$$3. \frac{9}{10} - \frac{3}{15} =$$

$$9. \frac{4}{16} - \frac{1}{20} =$$

$$4. \frac{12}{10} - \frac{1}{16} =$$

$$10. \frac{24}{15} - \frac{1}{5} =$$

$$5. \frac{7}{25} - \frac{2}{7} =$$

$$11. \frac{1}{17} - \frac{2}{9} =$$

$$6. \frac{3}{4} - \frac{5}{18} =$$

$$12. \frac{9}{10} - \frac{1}{4} =$$
