

## Find the Radius from Circumference of a Circle

i)

Circumference =  $90\pi$  mm  
Radius = \_\_\_\_\_

ii)

Circumference =  $12\pi$  ft  
Radius = \_\_\_\_\_

iii)

Circumference =  $222\pi$  cm  
Radius = \_\_\_\_\_

iv)

Circumference =  $1800\pi$  in  
Radius = \_\_\_\_\_

v)

Circumference =  $125\pi$  m  
Radius = \_\_\_\_\_

vi)

Circumference =  $18\pi$  yards  
Radius = \_\_\_\_\_

## Find the Diameter from Circumference of a Circle

Circumference =  $180\pi$  m  
Diameter = \_\_\_\_\_

Circumference =  $224\pi$  cm  
Diameter = \_\_\_\_\_

Circumference =  $80\pi$  in  
Diameter = \_\_\_\_\_

Circumference =  $11\pi$  yards  
Diameter = \_\_\_\_\_

Circumference =  $10\pi$  ft  
Diameter = \_\_\_\_\_

Circumference =  $1200\pi$  mm  
Diameter = \_\_\_\_\_
