

Finding Missing Numerator or Denominators with Domino

$$1. \frac{1}{8} = \text{Domino with 3 dots on top and 3 dots on bottom}$$

$$5. \frac{3}{19} = \text{Domino with 6 dots on top and 6 dots on bottom}$$

$$2. \frac{6}{36} = \text{Domino with 4 dots on top and 4 dots on bottom}$$

$$6. \frac{45}{60} = \text{Domino with 1 dot on top and 3 dots on bottom}$$

$$3. \frac{4}{20} = \text{Domino with 4 dots on top and 4 dots on bottom}$$

$$7. \frac{16}{28} = \text{Domino with 5 dots on top and 5 dots on bottom}$$

$$4. \frac{1}{12} = \text{Domino with 3 dots on top and 3 dots on bottom}$$

$$8. \frac{4}{15} = \text{Domino with 7 dots on top and 7 dots on bottom}$$

$$9 \cdot \frac{1}{11} =$$

$$13 \cdot \frac{2}{9} =$$

$$10 \cdot \frac{3}{13} =$$

$$14 \cdot \frac{20}{25} =$$

$$11 \cdot \frac{6}{14} =$$

$$15 \cdot \frac{35}{49} =$$

$$12 \cdot \frac{4}{10} =$$

$$16 \cdot \frac{5}{40} =$$
