Doing Repeated Subtraction

$$24 \div 6 = \boxed{}$$

$$
\begin{array}{cccc}
24 & 18 & 12 & 6 \\
-6 & -6 & -6 & -6 \\
\hline
18 & 12 & 6 & 0 \\
1 & 2 & 3 & 4
\end{array}
$$
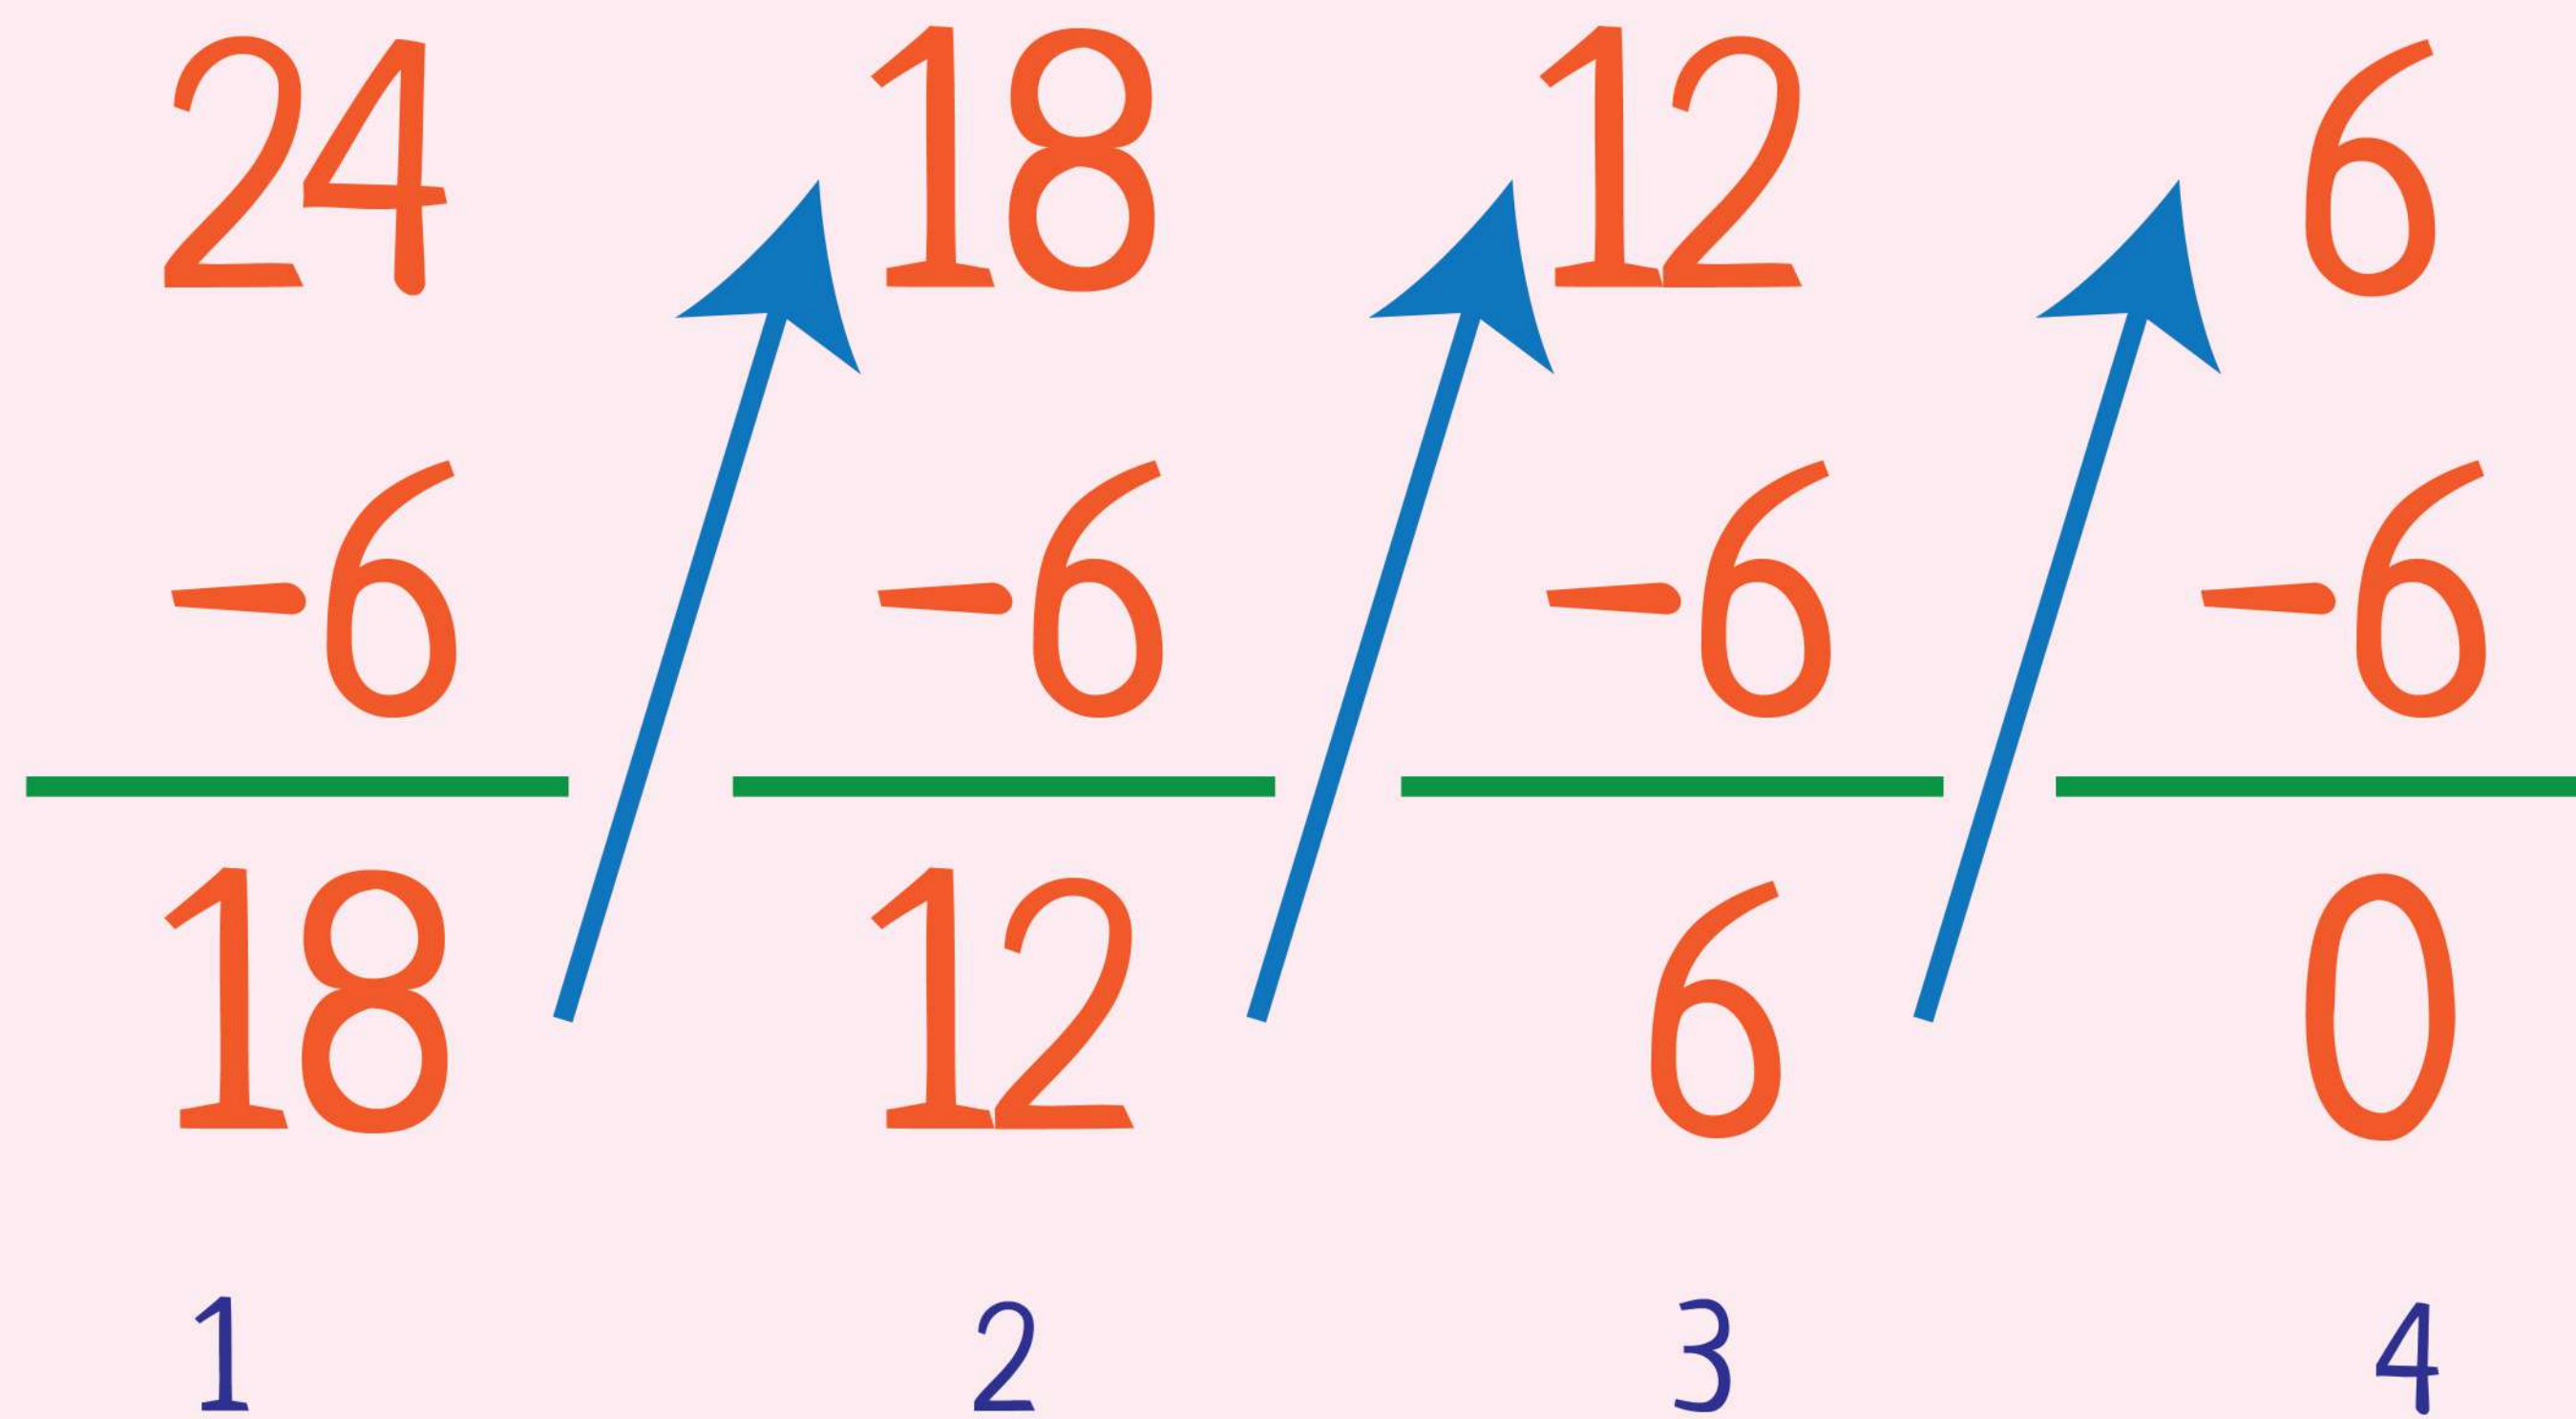

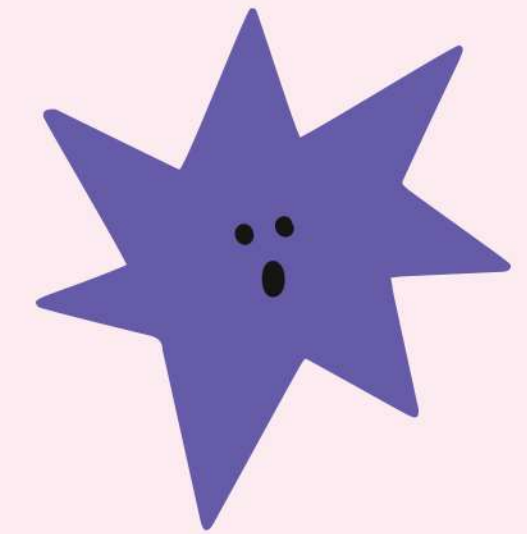

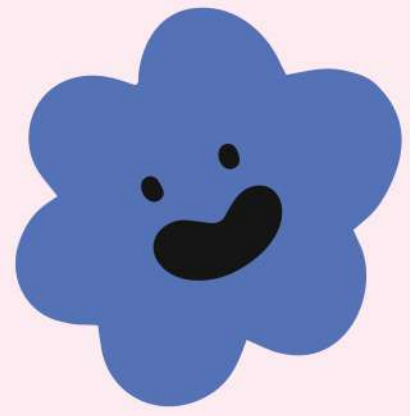

Subtract by divisor untill you get 0.

Count how many times you submitted to get 0.

It's 4 times.

So, $24 \div 6 = \boxed{4}$
