

Worksheet of Subtraction of Negative Numbers on a Number Line

1. Solve the following problems and plot the number on number line.

Subtract $(-7) - (-4) = \underline{\quad}$

2. Solve the following problems and plot the number on number line.

Subtract $(-3) - (-2) = \underline{\quad}$

3. Solve the following problems and plot the number on number line.

Subtract $(-5) - (-6) = \underline{\quad}$

4. Solve the following problems and plot the number on number line.

Subtract $(-6) - (-2) = \underline{\quad}$

5. Solve the following problems and plot the number on number line.

Subtract $(-7) - (-1) = \underline{\quad}$

6. Solve the following problems and plot the number on number line.

Subtract $(-9) - (-3) = \underline{\quad}$

Worksheet of Subtraction of Negative Numbers on a Number Line

1. Solve the following problems and plot the number on number line.

Subtract $(-2) - (-4) = \underline{\quad}$

2. Solve the following problems and plot the number on number line.

Subtract $(-8) - (-2) = \underline{\quad}$

3. Solve the following problems and plot the number on number line.

Subtract $(-9) - (-6) = \underline{\quad}$

4. Solve the following problems and plot the number on number line.

Subtract $(-6) - (-6) = \underline{\quad}$

5. Solve the following problems and plot the number on number line.

Subtract $(-7) - (-6) = \underline{\quad}$

6. Solve the following problems and plot the number on number line.

Subtract $(-9) - (-4) = \underline{\quad}$
