

Do the Following Divisions

$$\begin{array}{r} 12 \\ \div 3 \\ \hline \end{array}$$

$$\begin{array}{r} 18 \\ \div 2 \\ \hline \end{array}$$

$$\begin{array}{r} 15 \\ \div 5 \\ \hline \end{array}$$

$$\begin{array}{r} 16 \\ \div 4 \\ \hline \end{array}$$

Word Problem:

There were 20 hot air balloons in the sky. How many balloons will be there if we divide them into 2 groups?

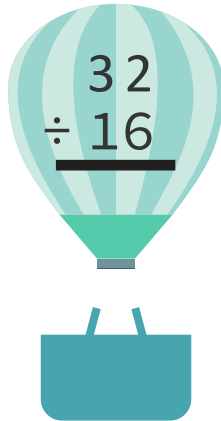

Do the Following Divisions

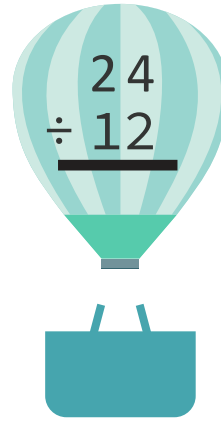

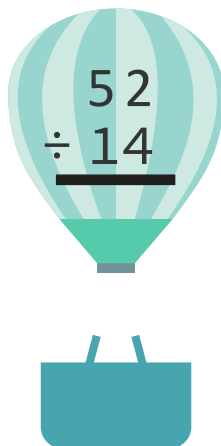

Word Problem:

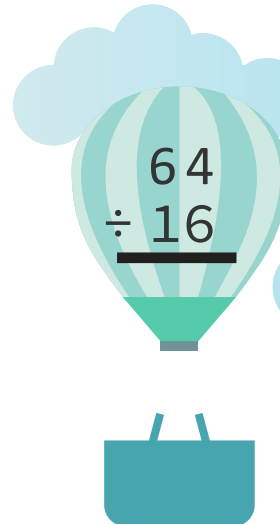

There were 9 hot air balloons in the sky. How many balloons will be there if we divide them into 3 groups?

Do the Following Divisions

$$\begin{array}{r} 32 \\ \div 16 \\ \hline \end{array}$$

$$\begin{array}{r} 24 \\ \div 12 \\ \hline \end{array}$$

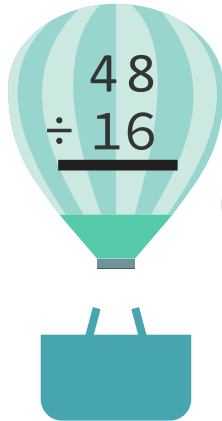

$$\begin{array}{r} 52 \\ \div 14 \\ \hline \end{array}$$

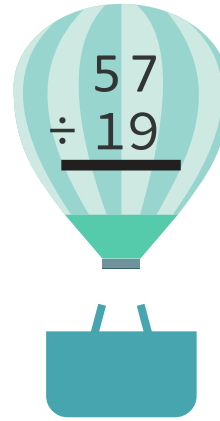

$$\begin{array}{r} 64 \\ \div 16 \\ \hline \end{array}$$

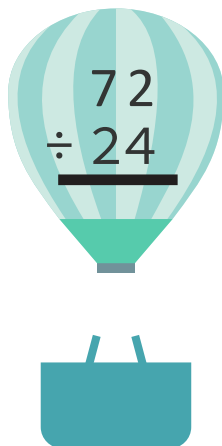

Word Problem:

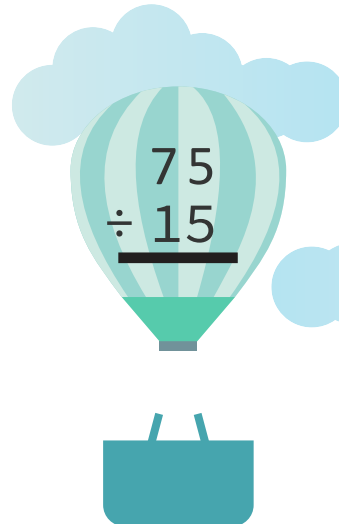

There were 40 hot air balloons in the sky. How many balloons will be there if we divide them into 10 groups?

Do the Following Divisions

$$\begin{array}{r} 48 \\ \div 16 \\ \hline \end{array}$$

$$\begin{array}{r} 57 \\ \div 19 \\ \hline \end{array}$$

$$\begin{array}{r} 72 \\ \div 24 \\ \hline \end{array}$$

$$\begin{array}{r} 75 \\ \div 15 \\ \hline \end{array}$$

Word Problem:

There were 80 hot air balloons in the sky. How many balloons will be there if we divide them into 16 groups?
