# Remove Counters

Friendship day is coming. So, you are thinking of presenting a friendship band to 10 of your friends each. Before you go to the market, your father has bought 4 bands already. Is that enough? Or do you need to buy more? If yes, how many?
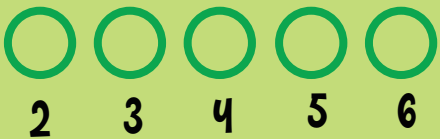

Make Counters equal to the total , that is 10

Give cross marks on counters equal to the given addend that is 4

Count the counters without cross mark

1
2 3 4 5 6

So, you need to buy more 6 friendship bands .
