

Division Facts Bingo Game

Instructions

- Bring the kids all together first.
- After that, invite the kids to gather around the game board by placing it on a mat or table.
- The teacher will distribute the small number cards to the students.
- Then, the teacher will roll the dice.
- After rolling the dice, the game will be started.
- The teacher will land on a number and shout loudly the number.
- The students will check their cards. If the number matches with one's card number he or she will raise his or her hand and say "Bingo".
- Then, the teacher will provide him or her with a division problem on the board.
- If he or she can solve the problem, the game will proceed. Otherwise, the teacher will help the child to solve the problem.
- The teacher will take the records. The highest number of problem solvers will win the game.
