

Divide the Whole Numbers by the Fractions

Example:

$$3 \div \frac{1}{2} = 3 \times \frac{2}{1} = 6$$

1. $2 \div \frac{1}{3} = \underline{\hspace{2cm}}$

2. $2 \div \frac{2}{3} = \underline{\hspace{2cm}}$

3. $3 \div \frac{1}{3} = \underline{\hspace{2cm}}$

4. $3 \div \frac{2}{3} = \underline{\hspace{2cm}}$

5. $2 \div \frac{1}{4} = \underline{\hspace{2cm}}$

6. $2 \div \frac{3}{4} = \underline{\hspace{2cm}}$

7. $3 \div \frac{1}{4} = \underline{\hspace{2cm}}$

8. $3 \div \frac{2}{4} = \underline{\hspace{2cm}}$

9. $5 \div \frac{1}{3} = \underline{\hspace{2cm}}$

10. $5 \div \frac{1}{4} = \underline{\hspace{2cm}}$

11. $5 \div \frac{2}{3} = \underline{\hspace{2cm}}$

12. $5 \div \frac{2}{4} = \underline{\hspace{2cm}}$

13. $5 \div \frac{1}{2} = \underline{\hspace{2cm}}$

14. $5 \div \frac{3}{4} = \underline{\hspace{2cm}}$

15. $6 \div \frac{2}{3} = \underline{\hspace{2cm}}$

16. $6 \div \frac{3}{4} = \underline{\hspace{2cm}}$

1. $9 \div \frac{1}{3} = \underline{\hspace{2cm}}$

2. $8 \div \frac{2}{3} = \underline{\hspace{2cm}}$

3. $10 \div \frac{2}{3} = \underline{\hspace{2cm}}$

4. $13 \div \frac{2}{3} = \underline{\hspace{2cm}}$

5. $12 \div \frac{3}{4} = \underline{\hspace{2cm}}$

6. $22 \div \frac{11}{12} = \underline{\hspace{2cm}}$

7. $23 \div \frac{3}{4} = \underline{\hspace{2cm}}$

8. $33 \div \frac{22}{25} = \underline{\hspace{2cm}}$

9. $15 \div \frac{3}{4} = \underline{\hspace{2cm}}$

10. $20 \div \frac{4}{7} = \underline{\hspace{2cm}}$

11. $35 \div \frac{5}{6} = \underline{\hspace{2cm}}$

12. $35 \div \frac{7}{8} = \underline{\hspace{2cm}}$

13. $45 \div \frac{9}{11} = \underline{\hspace{2cm}}$

14. $55 \div \frac{11}{13} = \underline{\hspace{2cm}}$

15. $26 \div \frac{13}{25} = \underline{\hspace{2cm}}$

16. $65 \div \frac{13}{20} = \underline{\hspace{2cm}}$
