# Worksheet for Writing Addition Sentences

To solve the problem, write an addition sentence.

1. 3 cokes are half.  
6 cokes are full.  
How many cokes are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ cokes.}$$

2. There are 8 green flags.  
There are 2 white flags.  
How many flags are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ flags.}$$

3. There are 2 green tomatoes.  
There is 1 red tomato.  
How many tomatoes are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ tomatoes.}$$

4. 2 balloons are white color.  
5 balloons are orange color.  
How many balloons are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ balloons.}$$

5. 3 ducks are in the pool.  
2 ducks are out of the pool.  
How many ducks are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ ducks.}$$

6. There are 2 glasses of water.  
There is 1 glass of milk.  
How many glasses are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ glasses.}$$

7. There are 7 big trees.  
There are 2 tiny trees.  
How many trees are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ trees.}$$

8. 6 mugs are on the table.  
2 mugs are on the floor.  
How many mugs are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \text{ mugs.}$$
