

Drawing 2D Shapes Riddle Worksheet

Here are some 2D shapes riddles on the worksheet. Can you solve riddles and draw 2D shapes?

7. I'm like a rectangle, but longer still, with opposite sides that give a thrill. Draw me on paper, tall and thin. What's my name?

Answer: _____

8. Six sides I have, like a beehive's cell, equally spaced, you can tell. Count them up, and you'll see. Which hexagonal shape am I meant to be?

Answer: _____

9. My sides are equal, just like a twin, three angles inside, let the fun begin. Draw me carefully, with precision and grace. What's my name in the 2D space?

Answer: _____

10. I'm not a square, but close, you see, four sides and angles, but not as symmetrical as can be. Draw me out, with care and skill. Which quadrilateral am I, do tell?

Answer: _____

11. Draw me with three sides and angles acute, no right angles here, I'm kinda cute. A triangle with charm and grace. What's my name in this geometric place?

Answer: _____

12. I'm like a rectangle, but leaning a bit, two sides are long, and two are a fit. Draw me with a slant and care. Which parallelogram shape do I share?

Answer: _____
