Prep-Work:

1. Print off pumpkins(one for each player) and print off spinners (1 page for two players)
2. Gather up board markers, pencils, and paper clips. You can also provide calculators.

Directions:

1. Player one spins the spinner made of a pencil and paper clip.
2. Then player one solves the problem, and player two checks it on the calculator.
3. If player one answered correctly, he may cover up that number on the pumpkin.
4. Now it is player two's turn to spin and solve, while player one checks the math.
5. Players take turns doing this until someone has covered up every number on the pumpkin.
